Scott:

I have reviewed the EPA's ground water data from the Smokey Mountain Smelters Site (47-559) and note that the high buffering capacity exhibited by the aquifer actually interfered with the preservation and analysis of the metals samples. Additionally, I noted that elevated levels of Manganese was detected in more monitoring wells than elevated levels of Aluminum.

I expect this data will be useful to you in the design of the remedy for the ground water contamination present at this site.

I also received the e-mail with the copies of the EPA's Special Notice Letters attached, and I understand that you are going to have a meeting with our Central Office staff soon to discuss this situation and the possible Consent Decree with the PRPs to have the PRPs implement the remedial action at this site.

Thank you for the opportunity to review this data, and I hope you are having a good week.

Lee Barron,  
TDEC-DoR/KFO

Hello Lee,  
Sorry about that, I'll get those files sent out on Monday.  
Thank you,  
Scott

Scott:

I received the disc for the Smokey Mtn Smelters Site in today's (MON, 11 JUL 2016) mail. However, the CD was blank (i.e. there was no data written to it).

Lee Barron,  
TDEC-DoR/KFO

Hello Lee,  
Will do, thank you.  
Scott

Scott:

Mail me a CD/DVD, or set up a drop box on the web where it can be downloaded.

Lee Barron,  
TDEC-DoR/KFO

Good morning, Lee,  
Hope that you are doing well. Can you let me know the best way that I can get you this data?  
Thank you,  
Scott
